

INSTITUTE OF INFORMATION COMMUNICATION TECHNOLOGY

VISION

To empower graduates of the Bachelor of Science in Information Technology program to become skilled professionals, equipped with entrepreneurial values, and prepared to excel in diverse fields of the digital landscape.

MISSION

In pursuit of ACES Polytechnic College Inc.'s mission, the BSIT Program is dedicated to fostering applied competence, innovation, and business incubation principles among students. It aims to cultivate a culture of consistency, hard work, and respect for technical skills, recognizing their value in ordinary and extraordinary endeavors within communities.

GOALS

The office, harnessing all its capabilities, will endeavor to:

1. Deliver a comprehensive array of courses encompassing diverse facets fo information technology, including programming, networking, cybersecurity, and software development, ensuring a well-rounded education in the field.

2. Employ cutting-edge teaching methodologies and technological innovations to enrich the learning process, fostering a deeper understanding of intricate IT concepts and facilitating student engagement.

3. Forge strategic alliances with industry leaders and organizations to facilitate experiential learning opportunities, internships, and career pathways for graduates, enhancing their employability and industry relevance.

GOALS

4. Cultivate an entrepreneurial mindset among BSIT graduates, ofering guidance, resources, and mentorship to support their aspirations of establishing successful IT ventures, and fostering innovation and enterprise.

5. Implement a robust faculty development program aimed at enhancing teaching competencies, updating curriculum content, and integrating emerging technologies into pedagogical practices, ensuring faculty members remain at the forefront of IT education and industry trends.

THANK YOU !
